

Visuality has become pervasive in all aspects of life over the past century and has accelerated in recent decades, due to the proliferation of media-based communication devices, which can be observed to have a strong foundation in visuality. In the content-rich VAVCD Master's Program, we go beyond a purely traditional visual understanding/practice and try to integrate them with other creative outputs such as photography, 3D, sound design, media arts, and time-based studies that are implemented through the various building blocks of our curriculum.

### **RESEARCH AREAS**

- Computer Science/  
Art & Design Hybrids
- Virtual Environments
- Visual Arts
- Photography
- Visual Communication Design
- Multimedia Design
- Typography
- Graphic Design
