

VISUAL ARTS AND VISUAL COMMUNICATION DESIGN M.A. (Non-thesis) GRADUATE SCHOOL OF SOCIAL SCIENCES

Over the past century, and acceleratedly so during recent decades, visibility has become pervasive in all aspects of life due to the proliferation of media based communication devices which can be observed to have a strong basis in visibility. Thus the mission of the VAVCD program is to provide the student with an in-depth understanding of visibility and its applications to the domains of Visual Art and Visual Communication Design. Our efforts go beyond a sole understanding / application of the visual fields themselves in that we also seek to bring about their integration with other creative output such as sound design, new media output and temporally based works implemented through the diversified building blocks of our curriculum.

Research Areas

- Computer Science/Art & Design Hybrids
- Virtual Environments
- Visual Arts
- Photography
